

## Don't just believe us... Here are the opinions of some of the users of Ease-E-Club:

I want to express my complete and total satisfaction with your Ease-E-Club product and your outstanding world class customer support. I use a lot of different software packages and I can't think of another company that delivers consistently on their product and promise of customer support. Without a doubt Computerease does both. The product is very user friendly and easy to learn and use.

We converted our two Curves clubs to Ease-E-Club in January 2005 and feel it has been the best operational business decision we have ever made. Conversion was a simple and easy one day process. Computerease is 65% less expensive (no monthly fee) than the previous product we used. Our experience after conversion with Computerease has been totally refreshing. We have not experienced any software problems as Ease-E-Club always works, as it should. It has considerably more power and flexibility than the previous product we used. Response to customer support questions has been quick and accurate. A "real" person who quickly transfers to the right person to provide the correct answer answers telephone calls to their 800 number. They make you feel as if you are their most important customer. Email questions are responded to rapidly even on Saturday and Sunday. Suggestions for improvements to the software are quickly evaluated and those considered viable for the customer based have been implemented within days for simple ones and a few weeks for more complex suggestions. Installing updates is simple and easy as the update files always fit on a floppy disk. What more could a customer ask for.

Anyone that has been frustrated with inaccurate, difficult to use and expensive fitness club management software should look at and adopt the Ease-E-Club product. I highly recommend this product as a cost-effective solution that enhances your ability to run your fitness business rather than hinder.

**ALAN SMITH, CURVES X 2, TEXAS**

It's so refreshing to work with folks who have not only great patience, but the ability to do "whatever it takes" to support our program. I can call or email and always have the confidence that my requests will be returned quickly and efficiently. It also helps to know that while we work through the problems, we can laugh the whole way. Thanks so much for your support... I look forward to working with you again.

**VICKIE JOHNSON, CURVES, FLOWERY BRANCH, GA**

## More opinions...

I use Computerease at my Pace for Men club in Langley BC. The program is extremely stable. I have had no problems with the data base at all. I installed the program at a Curves recently.

A real strength to the company is their support. I have been able to find people who can answer my questions every time I call. They return my call if they are not there - they don't hide. Updates come through periodically, with installation instructions. These are easily installed, and they do not impact on my data base. The other thing that is really important is that when I have a suggestion that makes sense to them, they seem to take me seriously, and they work on it.

I can recommend this software without the slightest hesitation.

**JEFF, LANGLEY, BC**

Software for fitness club management  
[www.ease-e-club.com](http://www.ease-e-club.com)

Join the growing ranks of fitness club owners and managers who have discovered how liberating and easy it is to use **Ease-E-Club**. **Ease-E-Club** was originally designed for a ladies only club and specifically accommodates their needs.

Throughout the United States, fitness clubs are being liberated from:

- High Software costs and Monthly Fees with inferior customer support
- Software that is hard to use and unstable
- Difficult Update procedures that require 3<sup>rd</sup> party technicians.

Our software has been designed to be easy to use and understand by non-technical users. **Ease-E-Club** provides you the ability to easily manage your club and the information required to retain and manage your members.

*Join the revolution and liberate yourself today...  
Try our software free for 30 days!*

Other key features include:

- Conversion of existing data is available at no extra cost
- A member of the Ease-E-Club staff will answer our toll-free 1-800 support number
- Customer support response outside normal work hours and on weekends!

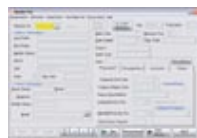

Don't let **Ease-E-Club's** low cost fool you — it has all the flexibility, power, and features you need and then some! Here are just some of the highlights of **Ease-E-Club**:
